Experience

Shadow Fox

Jan 2025 – March 2025

MERN Stack Developer Intern

Haldwani, Uttarakhand

- Developed and maintained responsive web applications using the MERN stack and REST Api ensuring seamless functionality across all devices.
- Collaborated with team members to debug, test, and optimize application performance, enhancing responsiveness and reducing page load times.

Projects

LuckyJob - Job Portal | MERN Stack, TypeScript | [Live Demo](#)

- Developed a full-stack job portal enabling job search, applications, and application tracking for candidates.
- Implemented recruiter-focused features for company profile management, job posting, and applicant review, allowing organizations to create company pages and manage hiring processes efficiently.
- Designed a scalable MERN architecture with a career blog for job-related resources and insights.

Expense Tracker | MERN Stack | [Live Demo](#)

- Developed a full-stack expense tracker with secure authentication and CRUD operations for income and expense management.
- Built responsive dashboards with transaction analytics and light/dark theme support.
- Enabled users to track spending patterns and manage financial records efficiently.

Sonar Rock Vs Mine Prediction | Python, Logistic Regression | [GitHub](#)

- Built a Logistic Regression model for sonar signal classification using data cleaning, preprocessing, and feature engineering.
- Performed exploratory data analysis and evaluated model performance using standard machine learning metrics.

Education

Graphic Era Hill University

June 2026

B.Tech in Computer Science & Engineering GPA: 7.91/10

Haldwani, Uttarakhand

Technical Skills

Languages: C, C++

Technologies: React.js, Express.js, Python, Node.js, Mongodb, Prompt Engineering, Numpy , Pandas , Sklearn, Matplotlib

Concepts: Operating System, Machine Learning, API , DBMS

Development Tools: VSCode, Jupyter Notebook, Version Control, Google Colab, Cursor, WindSurf

Achievements

- Built 5+ full-stack practice projects and completed 3+ Excel data analysis projects; currently learning Next.js, Power BI, Machine Learning, and Deep Learning to build scalable applications and data-driven solutions.
- Developed 3+ AI-assisted (vibe-coded) projects, including NextLesson, DeepFocus, and MindGate, focused on solving real-world productivity and learning challenges.
